5 Key Traits of Massive Winning Stocks

BullsEye Stock Trader

Mission Statement: **BullsEye Stock Trader**, a.k.a. “**B.E.S.T.**,” is a stock and options trading service that seeks out stocks that are outpacing the market in several key areas.

JimWoodsInvesting.com

How We Do It

We start by identifying stocks that have the “**Big 5**” major characteristics that tend to drive a stock higher.

Relative Price Strength

“Winning begets winning.”

We screen for stocks that are outpacing their peers for the past six to **12 months** on a **Relative Strength** basis.

We want consistent, proven winners outpacing at least **80% of all stocks in the market.**

We only want thoroughbreds, no donkeys!

JimWoodsInvesting.com

Earnings Power

“To the victors go the earnings spoils.”

We screen for stocks that are outpacing their peers for the past several quarters, and past several years, in terms of **Earnings Per Share (EPS) Growth**.

Here again, want consistent, proven winners outpacing at least **80% of all stocks in the market**.

Forget about value, the real “value” is earnings growth!

JimWoodsInvesting.com

Technical Analysis

“The beauty is in the pattern.”

Once we’ve screened for the “best-of-breed” stocks in terms of Relative Strength and Earnings Power, we need to check out the technical pattern to determine if now is the time to buy.

Here we want the chart to reflect a “bullish” pattern such as...

- Cup with handle
- Flat base
- Double bottom

We use the chart to determine if now is the right entry point.

Remember, we only want the B.E.S.I. stocks, and at the right time!

JimWoodsInvesting.com

Industry Leadership

“When you’re hot you’re hot.”

We tend to shop only in the aisles where the “best sellers” are found.

Why? Because this is where you will find the “smart money” shopping alongside you.

Tech stocks over the past several years are prime examples of industry leadership. This is where the real money was made, because it’s where the growth can be found.

“NewsQ”

“The medium is not the message - the message is the message.”

--Penn Jillette

You’ve heard of “I.Q.” But what’s “NewsQ”?

NewsQ is the ability to “*take the market’s pulse*” on a specific stock or industry to see if there is enough positive (or absence of negative) news items in that stock that can drive it higher.

NewsQ interpretation is part science, part art, part market awareness... and a lot of *applied experience*.

JimWoodsInvesting.com

The Options “Force Multiplier”

To supercharge our returns, we use the power of options.

We look to **buy slightly out-of-the-money calls** with expirations two-to-six months out that are trading at an attractive price.

If we are correct about the direction of the stocks we buy, and we buy them as they are beginning a new uptrend, then the out-of-the-money calls also will rise in price, and often dramatically.

This is the **easiest** options strategy you will find.

How's That Working Out For You?

'HOF' B.E.S.T. Stock Wins:

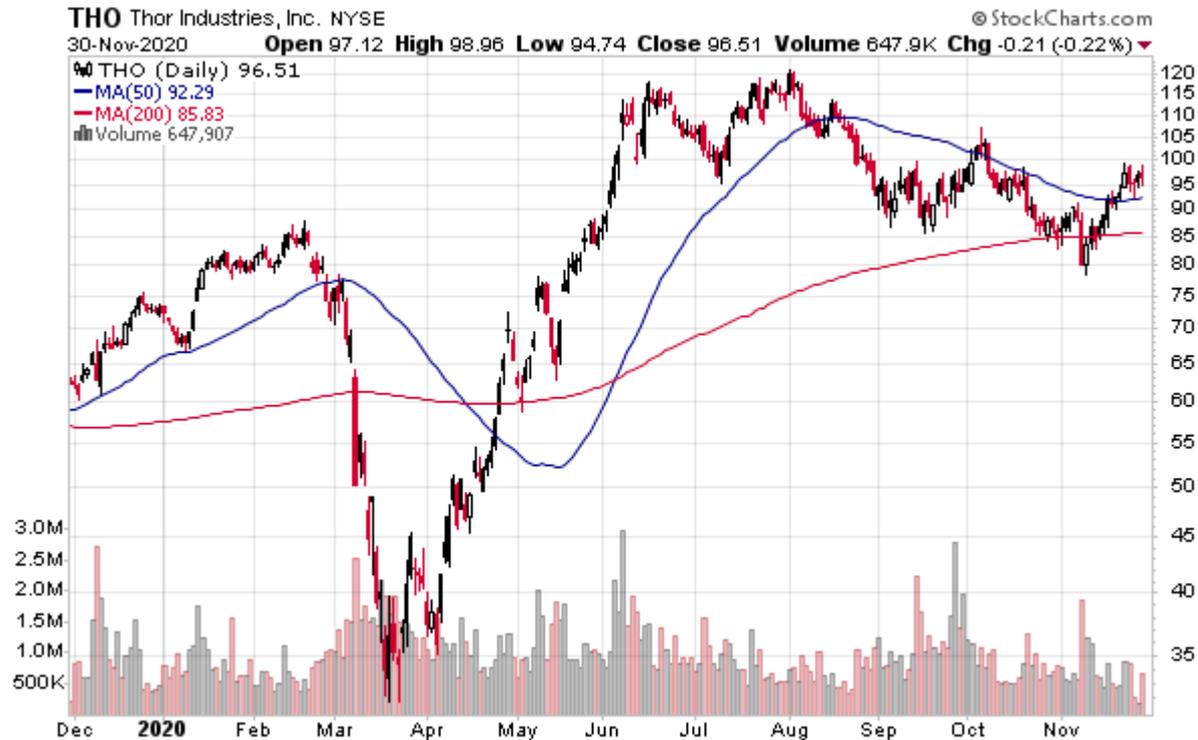

- Thor Industries (THO): 45.75% in 63 days
- Tractor Supply (TSCO): 20.02% in 56 days
